

Installers love our Universal Newels. By trimming the turning length at the top, each newel can be sized to fit virtually any application. UL newels should be used when code requires rake rails higher than 34".

### Universal Newels

### Half Newels

Running your railing into a half newel at a wall is a great way to finish off your stairway.

Please note that certain designs are not symmetrical and may not lend themselves to being split.

All newels may be ordered as half newels. Those in Oak (red), Poplar, Beech & Maple (soft) in Plain, Fluted (F) and Reeded (R) may be purchased in any quantity. Half newels in all other species and milling options must be purchased in pairs.

### Round Bottom Blocks

All of our newels and balusters are available with a Round Bottom Block (RBB). Simply add "RBB" to the part number. When using a Volute to start your stairway, the balusters are often crowded around the newel. A newel with the RBB option is a great choice for this application.

3010-350-TW/UF-RBB

5300-175-34-RT-RBB

### Decorative Rosettes carved into Newel blocks

Decorate your newel posts with rosette designs carved into their top blocks. When ordering please specify the number of sides you want this option on:

- 2 Opposite blocks... add part -2180 to the Rosette number
- 2 Adjacent blocks... add part -290 to the Rosette number
- 3 Blocks... add part -3 to the Rosette number

For 3" wide Newels specify Rosette R1259 (which is 2 1/4" wide) or for Newels up to 3 1/2" wide choose R1266 (which is 2 5/16" wide).

R1259 (on 3" Block)

R1266 (on 3 1/4" Block)

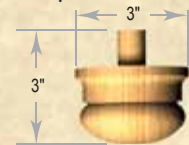

R1266 (on 3 1/2" Block)

### Newel Drops

When installing landing newels with a portion of their bottom end showing, consider decorating it with Newel drops.
